

Intermol BIO Cleaner

Technical Datasheet

GENERAL DESCRIPTION

Intermol BIO Cleaner is a surface cleaner of natural origin, neutral, high function, which acts degrading, vegetable and animal fats and oils, thus helping to improve processes in the removal of fats in any area regardless of the material of The same as the residual effect.

APPLICATION

1. Biodegradable, does not pollute the environment.
2. Free of toxic chemicals and acids.
3. Removes hard-to-clean grease on hard surfaces.
4. Does not contain petroleum derivatives.
5. Take care of the health of those who come into contact with the product.
6. It does not leave fatty residues.
7. Suitable for use in stainless steel and chrome installations.
8. Does not damage metals, paints, plastics, or vinyl.
9. It does not cause dermatitis or damage to the mucous membranes.
10. It does not generate toxic vapors.

INSTRUCTIONS

Apply directly or diluted in the usual or most appropriate way, to the area to be degreased, leaving it to stand in case of being necessary for 5 to 10 minutes depending on the degree of filth.

If you require support with mechanical or manual means such as brushes, fibers, flannels, you can use a spatula to remove excesses and perform a more effective cleaning

To rinse it can be removed with any system, water jet, pressure washer, steam, pressure equipment or air.

PRECAUTIONS

Use personal protective equipment.
